Accepted Files

Submit ads as “press quality” PDFs with dpi of 300. Make sure your artwork is designed for print media, not for web use. Web images are only 72 dpi because they are designed for use on websites. Artwork or photos for print media require higher resolution. All elements within the PDF should be created, scanned or shot (if a photo) at 300 dpi.

Ads must be designed to BUZZ size specifications. Do not send a vertical ad to fit into a horizontal space, for example. Ads created for other publications will most likely not fit BUZZ size specifications. The ad must be reconfigured.

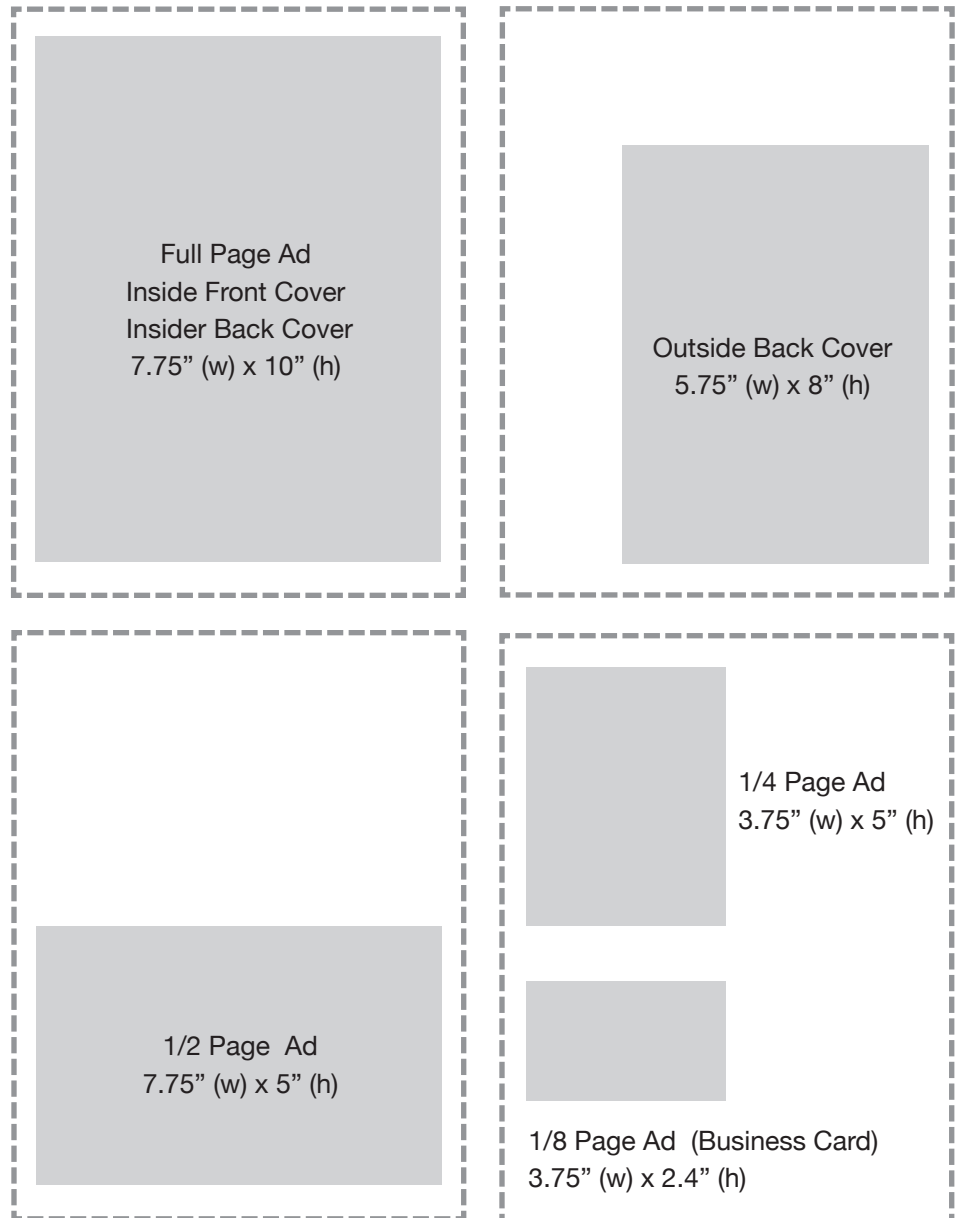

Design Help Available

If you would like us to create an ad for you, please provide text and separate art files for logos or photographs. (A charge may be applied for demanding design work.)
