To: Planning Board,

I am writing you as the Fire official representing Bloomfield Fire Department. I am reaching out in regards to the residential property located at 1552 Broad St which is currently under review by your Board. I have looked at the property and I recommend installing fire sprinklers in the new structure. Fire sprinklers are a crucial component in home Fire Safety. They can control and may even extinguish a fire in less time than it would take a fire department to arrive on scene. The presence of these sprinklers significantly enhances the safety of the residents and aids the protection of property from severe damage. Given presence of these sprinklers, we are confident in the property's adherence to fire safety standards.

I trust the planning Board will take my assessment into account during the review process. Feel free to reach out if you require any further information or clarification. Thank you.
