

BOIL WATER ADVISORY LIFT NOTICE
June 26, 2024

FOR CUSTOMERS OF THE BLOOMFIELD WATER DEPARTMENT – PWSID 0702001

Please note that this notice is being reissued because it was inadvertently removed from the Bloomfield Township's website.

Customers of The Bloomfield Water Department were notified on June 25, 2024 of a possible problem with the drinking water due to a water sample coming back indicating the presence of e-coli and were advised to boil the tap water before using as a precautionary measure. We are pleased to that subsequent water quality testing shows no presence of e-coli in the drinking water and the water quality to be safe.

THE BOIL WATER ADVISORY IS LIFTED and it is no longer necessary to boil your water before using. The following measures are strongly encouraged at this time:

- Run your water faucets for 3-5 minutes to flush your service connection and interior plumbing with water from the service main.
- Empty and clean your automatic ice makers and water chillers.
- Drain and refill your hot water heater if the temperature is set below 113 degrees Fahrenheit.
- Service connections with a water softener/cartridge filters should be run through a regeneration cycle or other procedures recommended by the manufacturer.
- Water reservoirs in tall buildings should be drained and refilled (as applicable).

We apologize for any inconvenience and thank you for your patience. If you have any questions or comments, please contact:

The Bloomfield Water Department at 973-680-4009 or via email at engineering@bloomfieldtwpnj.com
